

## ABOUT ME

I'm a dedicated programmer looking for a team to work with long term. I have a deep love for everything javascript and I enjoy learning new technologies for use in both personal and professional ecosystems.

**Personal website:** [McKissick.dev](https://mckissick.dev)

## EXPERIENCE

### **Vuee.io**, Remote — *Vue component engineer (intern)*

January 2019 - Ongoing (intern)

Developing generic vue components for use within the vuee ecosystem for free use by platform developers.

### **Skybrook foundation**, Remote(Kalispell MT) — *Front end developer*

August 2017 - September 2018 (volunteer)

Development, design, and deployment of the online user and volunteer experience, including core windows software for managing volunteers and hour tracking.

## Training

### **Udacity** — *Nanodegree in front-end development (Google scholarship)*

January 2018 - October 2018

Focused program covering standard front-end technologies including react, ember, grunt, etc.
